Subject: Re: Regional EE coordination on Fort McMurray

Hi Kia,

We changed our minds and we will also apply for an exceptional event on May 25 - 26 and July 20-21.
We are going ahead and applying it to all of our sites.
I've updated our spreadsheet to reflect this.

Our answers to the questions are

1) All 2016 dates they intend to include in their respective demonstrations.

Maryland plans to ask for an exceptional event determination for:

Event #1 --- May 25 and May 26.

Even t#2 --- July 20 and July 21.

For both events we would need the data a few days prior to and after the event.

2) All monitors they intend to claim has having regulatory significance in their respective demonstrations.

We plan to look at all ozone monitors in Maryland.

Thanks for your help,

Jen

Hi Sean and Jen,

I have a call this week to discuss regional coordination of the EE packages for the 2016 wildfire events and issues with the PM_{2.5} speciation data. Please see Ben's email below.

Would you email me the information requested below (questions 1 & 2). You could revise the spreadsheets you sent me, include a column for the dates affected and remove the monitors that will not be part of the EE package (i.e. non regulatory significant).

Thanks,

Kia Hence

Region 1, 2, and 3 Colleagues,

We understand there may be a delay in the availability of 2016 PM speciation data in AirNowTech, which could impact the ability of states to include such data in exceptional event demonstrations for ozone in advance of the May 31 deadline associated with ozone designations.

With the aim of working out an expedite process for states that would be affected by a delay, could you try to obtain the following information for any states in your region that you expect to submit an exceptional events ozone demonstration for 2016?

- 1) All 2016 dates they intend to include in their respective demonstrations.
- 2) All monitors they intend to claim has having regulatory significance in their respective demonstrations.

This information would be extremely helpful to have for Thursday's call.

Thanks,

Ben
